About three thousand have been on the grounds to-day, and the best of good feeling seems to prevail.

The quintity of slock entered and on exhibition is large—particularly sheep. I counted upwards of 220 in the several pens on the ground. They are principally of the fine wool grades, some of twhich are spleadid specimens. Mr. J. D. Pattasos, of Westfield, M. Y., has quite a large masher of his fine blooded French Merino Sheep. They are great. One we noticed, they say carries a 40 lb. fleece, and weighs 325 lbs herself, and is held at the sing little sum of \$1000.—

But we have some Wisconsin productions of sheep on exhibition here, that are not far behind. We might mention some specimens, but time will not permit.

The show of horses, cattle and swine, also, is most excellent, and will compare favorably with anything of the kind I have seen in the state.

There are upwards of 75 horses, marcs and colis, many of superior quality and blood. In cattle, we are will represented, too. Dountous of bachelors this afternoon after attending the opera, was guilty of making a gift under circumstances somewhat original. He entered a millinery store and according a very pretty attendant, inquired the price of a bat which he saw in the window. LANESFOR ATLANTIO STEAMERS.—Lieut Maury hus recognly written a letter concerning lanes for steamers crossing the Atlantic, which is published by the New York Board of Underwriters. In this letter, he states that the part of the Occan used by the Collins and Corard steamers in their voyage to an fire, between the mealdians of 15° and 55° west, is, for the American 300 miles broad, and for the English 150 broad. The American roadway overlays and includes the English. Consequently there is a breadth of occan 300 miles wide, in any part of which a sailing versal, by aight or in a fog, is liable to be brought into collison with the steamers. Lieut Maury therefore proposes new lanes for steamers scross the Atlantic, which will lesson the habilities by diminishing the chances of collision. He gives in his pamphiet full charts of these lanes, and the whole form a most valual is contribution to cause of pautical science. LANES FOR ATLANTIC STRANGES.-Lieut Maury cause of pautical science.

Somerning New.—On Friday a drove of two bundred and fifteen cattle arrived in this city from Texas, being the first cattle from that State that ever passed through Albany. They left Texas some four months ago. They were driven from Texas to the Mississippi, up the Mississippi to Illinois, where they spent some days in recruiting. From Illinois they came down the Lake to Boffalo to Albany by the O. Railraod. By the time they reached the Hudson they had inatoped twenty-two hundred miles. They were in fine condition, and exhibited a shape that speaks well for the cattle breeders of the extreme South. well for the cattle breeders of the extreme Bouth well for the cattle bracders of the extreme Bouth. Owing to the absence of winters, and the superabusdance of pastures, Texas must and will become the greatest cattle State in the Confederacy. The steamer Cleveland came in from Chicago on Friday morning last with a fair load of passeogers and freight. In the evening, Caplain Green and her officers invited our citizens to a dance on board, and some fifty ladies and gertlemen availed themselves of the invitation. The diance passed off brillantly, the music and suppart were good, and the officers of the Cleveland proved their gallantry on slove to be equal to their seumanship on the water.

There will be an effort made to put this first boat on the Collingwood route, and we hope it may succeed, though we do need a boat on the troute site now occupies between here and Chicago. She is a large, handsome, and awift steamer, and will be popular wherever she goes.—

Somerning New. - On Friday a drove of two Sometime New.—On Friday a drove of two hundred and fifteen cattle strived in this city from Texas, being the first cattle from that State that ever passed through Albany. They left Texas some four months ago. They were driven from Texas to the Mississippi, up the Mississippi to Illinous, where they apent some days in recruiting. From Illinois they came down the Lake to Buffalo to Albany by the O. Railraod. By this time they reached the Hudson thay had manped twenty-two hundred miles. They were in fine condition and exhibited a shape that speaks well for the cattle bracters of the extreme South. Owing to the absence of winters, and the super-Owing to the absence of winters, and the super abundance of peatures, Texas most and will be abundance of pattites, Texas most and will become the greatest cattle State in the Confederacy.

A "FAVORABLE ALLUSION."-The Wisconsin very truly says of Mr. E. D. Hollow, who is one of the prominent candidates for the Republican omination for Governor, that "his strength is with the honest yeomanry and with the masses by whom he is greatly esteemed." The Wis censis looks therefore "to the healthy sentiment of the country" to effect Mr. Horron's examination. We infer that the Wisconsin intends to support him, if nominated, against its quandom riends, "Barstow and the Balance."

Dis space permit, we could give many hundred certificates from stip parts whisee the Palls have been used, but oridence even more convincing than the experience of original public men, is found in their effects upon tital. cates from as parts where the Pills have been used, but originate seves more convincing than the specience of similarity public men, is found in their effects upon tital:

These Pills, the result of long in: estigation and sindy, are offered to the public as the best and most complete which the present state of smallest science can afford—They are compounded not of the drugs themselves, but of the insellectual virtues only of Vegetable remarkes a committeed together in such a measure of purity, and combined together in such a measure as to consume the best result is. This spate not composition for medicinas has been found in theory Factorial and Fills both, to produce more edificient remay than had hitherto been obtained by any practua. The reason is perfectly obvious but only the second of composition, every medicine is but only as the best of composition, every medicine is but only as the best of composition, every medicine is desired for the curative effect, is present. All the thest and obsentions qualifies of each substance amployed its left between the same of the composition coals being resisted. Hence it is saff wident the effects should prove as they have prove, more party remedial, and the Pills a more powerful anidote to discuss them any other incidence known to the world.

As it is frequently expedient that many medicines should be taken under the connected of an attending Flysician, and as no does not preparly judge of a remedy without it, owing its composition, I have stupied the arcurate Formuse by which both my Restoral and Pills are missing the composition, it has stupied the valued between the both of Practiciones in the valued by the provinces and Britti ha American Frovinces. It hewever, they will be forwarded by mall to his request.

Of all the Prison Madelinas hats are othered, how is only to the forwarded by the force of the composition was knewn? The fill for composition was knewn?

Bathing and Hair Dressing That his consists in their composition was known; Their life consists in their mysecies at have no mysteries.

The composition of my preparations brief spee to all men, and all who are competent to judge on the subject freely, acknowledge their consistions of their intransactis. The Cherry Pectoral was pronunced by stiened tife man, to be a wonderful medicine before the effects were known. Many emirant Physicians have declared the same thing of my Pills, and even more considerity, and are willing to savily that their suticipations were more than resilized by their effects upon trial.

They operate by their powerful industrice on the internal viscous to purify the blood, and stimulate it into handle action—remove the other texticines of the same, bowers, these, and health, and by correcting, wherever they sails, such derangements as are the first origin of disease.
